## **New Water Service Connection**

All new water connections applied for within Chino Meadows II, IV and V will be installed only after mobile home or house is installed or constructed and water lines have been inspected by our installers.

This must be done prior to backfilling trench.

Minimum trench depth may not be less than thirty (30) inches from ground level. A back-flow device (Check Valve) approved by state and/or other regulatory agency must be placed in the service line where it leaves the meter to the house or mobile home and must be visible to inspectors. A Gate Valve must be installed in the line approximately twelve (12) inches from the meter. If either of these items is missing, service will be denied until requirement is met and device is installed. This requirement has been in effect since 1985 and will remain in effect unless ordered changed by state or federal law. Customer is responsible for installation of all lines and devices from water meter to home.
